

# Lectures on Pure and Applied Math

## Announcing

A Seminar Presentation  
on October 30, 2014  
at 3:00 pm in Maxcy 212  
at The University of New Haven

### Dr. Ramesh Sharma

Department of Mathematics and Physics  
The University of New Haven

**Title: Can we divide a vector by another vector?  
Yes, we may.**

### Abstract:

This talk will address the issue of dividing a vector by another vector under a restriction. The methodology uses some linear algebra and provides interesting insights into the quotient of two vectors. This talk is primarily pedagogical and would be of interest to students interested in mathematics, physics, and engineering.

### Further Information

For further information, please contact Angie Domschine at the Department of Mathematics, Office: Maxcy 204, 203-932-7250, ADomschine@newhaven.edu.
