

Lectures on Pure and Applied Math

Announcing

**A Seminar Presentation
on November 13, 2014
at 3:00 pm in Maxcy 212
at The University of New Haven**

Dr. Houssein El Turkey

Department of Mathematics and Physics
The University of New Haven

**Title: Algebras . . . an abstract version
of college algebra**

Abstract:

In this talk I plan to introduce algebras which form a generalization of the algebraic systems we encounter in college algebra. Examples of these objects will be the main topic of the seminar. If time permits, diagrammatic algebras will be introduced.
